

Compliance Deadlines?

Organizations Facing Compliance Deadlines Have Hope

More organizations are facing more compliance deadlines than ever before. HIPAA, EEOC, Workplace Harassment Prevention, and a slew of other government regulation issues now have real teeth in their enforcement measures. Fines for compliance failure can range up to \$250,000 and criminal penalties can include imprisonment for up to ten years.

Responsible organizations want to meet these challenges in an aggressive and positive manner. This includes taking a systematic approach to the compliance process. We call it *compliance process management*[™].

Now your compliance programs will benefit from a systematic approach to the tasks of identification, training, certifying, and tracking employees. Most importantly you will have records of your compliance efforts created at each step along the way.

SEDATA can assess your compliance efforts, explain how our process and

methodology will bring consistency to your operations, improve vital record keeping, and reduce tedious, expensive, and error-prone manual labor. We can then help you design a custom *compliance process management*[™] system that addresses your organization's specific needs.

About SEDATA

SEDATA (Latin for "knowledge data") provides Profit Enhancement, Performance Improvement, Learning and Knowledge Management consulting. Principal Consultant at SEDATA is Rick Darby, architect of the Cisco eLearning Ecosystem and consultant to Fortune 1000 companies, mid-tier companies, and government organizations.

SEDATA provides solutions to compliance issues, worker performance, and training needs driven by new product rollouts, new service rollouts, new system rollouts, mergers, acquisitions, cutbacks, or rapid growth.

Whether these needs are a response to competitive pressure or government regulation SEDATA's solutions typically provide more effective learning at lower cost and with faster implementation.
